- The Company's project-management system ensures a high level of control over all the stages of a project, from conception to the hand over of a job to the Client.
- Win-win solution between the company and the Client.
- Cost and time overruns minimised by timeous management techniques such as risk assessment from the outset of the project.
- Client requirements and preferences easily accommodated.
- Reduced project duration and efficient delivery.
- Long term platform for meaningful collaboration established by effective teamwork between the Client and the Company.

The Company is committed to making a difference and although we understand the need for planning, we stay flexible to accommodate changing circumstances and the need of the moment.

Heldeen Steel continuously strives for integrity and realises the greatest achievements have always been accomplished by groups rather than individuals. We therefore employ, train and upgrade enthusiastic, unskilled people we have identified within society who find themselves with little prospects for their future.

Heldeen Steel was founded in April 2001 in Durban with the vision of providing sound engineering and a total system solution for fabrication to the specific needs of our clients.

CUSTOMISED SOLUTIONS

The Company offers excellent technical knowledge, a professional service and specialises in on-site consultation and troubleshooting. Solutions are provided to the challenges of converting steel plate into marketable products. All kinds of projects are handled from the largest contracts, manufacturing of items, to modifications.

The Company is also a Steel Service Centre incorporating:

- Guillotining
- Bending
- Rolling
- Profile cutting
- Grinding
- Supply of Steel

CUSTOMER SATISFACTION

Heldeen Steel focuses on client service, speedy delivery and attention to every detail. We work together with our clients to ensure their product fits to perfection, every time and are committed to constantly exploring new ways to improve levels of performance and so deliver a job well within the time required by the customer.
